TC 4 1964  
STATE ENGINEER  
OFFICE

Mr. E. J. Fjeldsted, Manager  
Weber Basin Water Conservancy District  
R.F.D. #2, Box 223  
Layton, Utah

Dear Mr. Fjeldsted:

Enclosed are the original and duplicate original copies of the contract between the Weber Basin Water Conservancy District and Spring Creek Angus Ranch for the sale of the use of 144 acre-feet of replacement water for irrigation use. The contract has been approved by the United States.

Water for this contract is not now available under a unit notice. However, water may be delivered on a rental basis until notice is given that water is available.

The point of use for this water is in the vicinity of the confluence of Spring Creek and East Canyon Creek, about seven miles southwest of Hanship. One diversion is on Spring Creek and two diversions are on East Canyon Creek. The water intercepted by these diversions would normally flow into Weber River through East Canyon Creek. An exchange may be made by releasing an equivalent amount of water from Hanship Reservoir or other project works as directed by the State Engineer or his representative, for prior right users who would be shorted by such diversions.

This is the only contract to be approved for irrigation water in this area. Please be reminded of the project policy limiting replacement contracts in the upper East Canyon Creek drainage to the use of project water for domestic and miscellaneous purposes.

One copy of this contract is for your files, while the other copy is for the Spring Creek Angus Ranch.

Sincerely yours,

*Clinton D. Woods*
